Nature Of Opinion

Docket Number: E-01933A-15-0322 **Docket Position:** Against

"Utilities like TEP have seen their demand growing more slowly," said Stan Reynolds, from UA . In its request to the Corporation Commission, TEP estimates it spent almost \$1.3 billion on infrastructure improvements in the last four years. After its last rate change, the utility's return to shareholders was 10 percent. According to a shareholder report from TEP's parent company, Fortis, the request would bump that number up to 10.35 percent. The first, an increase in monthly service fees for residential users by about \$12 a month." <https://www.azpm.org/p/featured-news/2015/11/10/75986-tucson-electrics> The Utilities never wanted PV systems on roof tops. It sounds to me like they are going to penalize EVERYONE for the advantage of the few. I see and understand the issue TEP has with solar systems. I do not see why I should have to substitute the solar industry and their customers. Guaranteed 10% profit, really who gets that into days market climate.
